Always be a lifelong learner

2  Acknowledge and value your own strengths, experiences, and knowledge

3  Don’t be afraid to experiment and give yourself permission to fail and try again

4  Know that it is impossible to master every new media technology (and that you don’t need to in order to be a great caregiver)

5  Plan, implement, revisit

6  Know that stuff will go wrong

7  Utilize open-ended questions and follow the child’s lead

8  Value practitioners

9  Support the strengths and needs of your child

10 Be a co-learner with your child
