

Instructions for Completing the Immunization Record Form

The Illinois Department of Public Health requires that all students attending a post-secondary institution show proof of the following immunizations before registering for classes:

Required Immunizations:

- **Proof of Covid 19 Vaccination**
- **Two doses** of a live **measles** vaccine administered at least one month apart **and** after first birthday
- **Two dose** of a live **rubella** vaccine administered after first birthday
- **Two dose** of a live **mumps** vaccine administered after first birthday
- **Three doses** of **Diphtheria, Tetanus and Pertussis** (DTP, DTaP, DT, Td or Tdap) containing vaccine. **One dose** must be **Tdap** vaccine. The **last dose** of vaccine must have been **within ten years** of enrollment

Proof of immunity or a diagnosis of measles, mumps, and rubella is also acceptable documentation.

Acceptable documentation must contain the month, day, and year of the vaccine, proof of immunity, or the day the disease was conferred accompanied by a licensed health care provider's signature.

Exemptions:

The following exemptions will be granted in lieu of the vaccine if proper documentation is presented along with this form:

- Medical condition or pregnancy
- Religious belief
- Birth date on or before January 1, 1957 (**only an exemption for measles, mumps, and rubella**)

Helpful tips:

If you are having difficulty locating these records, contact your high school. Many state high school health records comply with these immunization requirements.

If you know you have received a particular vaccine but do not have any records of the immunization, a titer blood test can prove your immunity to measles, mumps, and rubella.

Questions:

If you have questions about the Immunization Record Form, please contact Stacy Branch, Associate Director, Registration and Student Records at sbranch@erikson.edu or 312.893.7153.

Mail completed form to:
